

## C.L-B-032

### 双站式弯圈机+恒温旋转炉

#### 功能

两站式自动旋转弯架，将眼镜前框框面压成弧度形状速度快，定型效果好，配备自动恒温箱，镜架加热温度统一，弯架标准。

#### 优点

- 松下冷却系统
- 日本欧姆龙电器
- 进口日本硅胶模
- 日本及台湾气动元件
- 进口PLC人机界面
- 台湾亚德客气缸

### Rotary bending frame machine (with automatic constant temperature cabinet)

#### Functions

It has two-station automatic rotating bending, fast speed, and good setting effect. It is equipped with the automatic constant temperature cabinet, heating temperature of glasses frame is uniform, and bending frame is standard.

#### Advantages

- Panasonic cooling system
- Japan imported silicon rubber mold
- Imported PLC man-machine interface
- Japan Omron Electric Apparatus
- Japan and Taiwan pneumatic components
- Taiwan AirTAC Cylinder
